

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph starting at page 13, line 12 as follows:

Upon the completion of act ~~615~~ 610, the process proceeds to act 620, wherein the input mechanism is examined to compare a “current” value contained in the input mechanism at the time of the user’s indication to a predefined, configurable “default” value. In some embodiments, the default value is specified by the commands as a value which the input mechanism should contain absent the any user input to the input mechanism. For example, in some embodiments, the default value for an input mechanism may be “0.” However, the invention is not limited in this regard, as any default value may be employed.

Please amend the paragraph starting at page 15, line 27 as follows:

Upon the completion of act 445, the process proceeds to act 450, wherein a command based on the “add to shopping cart” request is issued to the server system 310. As with the act 410, this may be accomplished using any suitable communication technique, device(s), and/or protocol(s). Upon the completion of act 450, the process proceeds to act 455, wherein the command is received and processed by the server system 310. This may be performed in any suitable fashion, and is unimportant to an understanding of the invention. Upon the completion of act ~~465~~ 455, the process completes.
